Manual

1.   Start Multi Sequence Edit by clicking on the PlugIn.

2.   Set your Changes. These Changes will be indicated by a green Background.

This is the representation of an Edit Settings with the current default settings.
To change a setting, please click on the corresponding field.x
 The field will be highlighted in green to indicate that this parameter will be changed
during later execution.
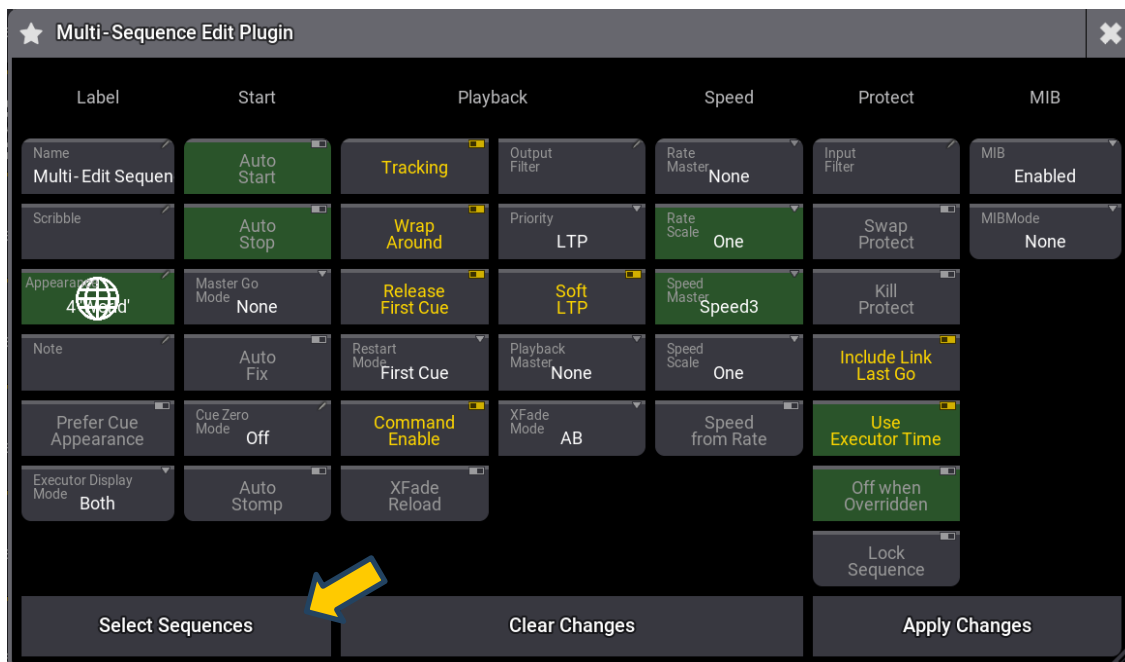

At **Name**, a new name can be assigned. If multiple sequences are edited simultaneously,
these sequences will be additionally numbered, as the same name cannot exist twice.

Scribble and **Appearances** can be selected from their respective pools.
Upon execution, they will then be assigned to the selected sequences.

In the **Note** section, text can be entered which will then be applied to all selected sequences.

In all other fields, the procedure is the same as in a single sequence.
Each function can be found in the grandMA3 User Manual
under the keyword 'Sequence Edit Settings'.

3.   Then click on 'Select Sequences' to choose the sequences to be edited.

4.   Select the sequences for which you would like to change the Edit Settings.
     The selected sequences will be highlighted with a green background
     to indicate that they have been chosen.
